PROJECTS

CARDIFY — Digital Business Card Platform (Personal/ Academic Project)

- Developed a web application allowing users to create, manage, and share digital business cards
- Implemented user authentication and login system
- Built a dashboard displaying real-time card overview and statistics (e.g., total active cards)
- Designed features to create, preview, view, and delete digital cards

- Used React for the front-end and [Django] for back-end functionality
- Deployed the application live using Vercel.
